

# Service Manual SC-4200

3 HP Automatic Rear Delivery Swivel Mount Control Head

Rev 5 - 1-9-20 900-017M

- Installation 1. Place the shipping carton in the desired location. Remove the unit with pivot arm system from the shipping carton.
  - 2. Mark 4 hole locations under the shelf and pre-drill holes for the mounting screws.
  - 3. Align the drilled holes with the holes on the mounting bracket. Insert 4 screws and fasten the mounting bracket securely to the underside of the shelf.
  - 4. Insert the control head pivot arm into the block. Feed the umbilical through the hole in the mounting bracket.
  - 5. Install master valve assemblies, with filter and regulator, onto the manual shut-off valves. (Pressures are preset at the factory: 80 psi air, 40 psi water).
  - 6. Connect the supply and vacuum tubings as shown in the Utility Center Template & Guide.

## **Adjustments**

Final Check air pressure, adjust to 80 psi if necessary. Check water pressure, adjust to 40 psi if necessary. Test handpieces for proper function. Test syringe for proper pressure and function.

- Operation 1. Turn on the master switch located on the left side of the control head.
  - The handpiece is automatically activated when lifted from the holder.
  - Depress the foot control to activate each handpiece. Pressure is shown on the gauge for the handpiece being used.
  - 4. Individual handpiece pressure adjustments are located on the autoblock inside the control head. To adjust the pressure to each handpiece:
    - a. Turn adjustment screw *clockwise* to decrease the handpiece pressure.
    - b. Turn adjustment screw counter-clockwise to increase the handpiece pressure.

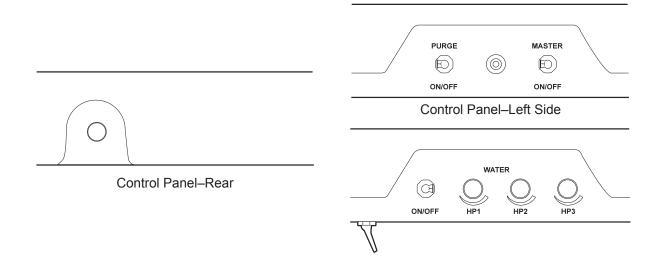

### CAUTION

When adjusting the handpiece pressure, do not overtighten the screws. Damage may result.

- 5. Activate the water spray to the handpiece by flipping the toggle for the water located on the right side of the control head.
- 6. Water coolant flow adjustments are located on the right side of the control head.
- 7. Air Coolant Adjustment is located on the rear of the control. The flow adjustment valve will reduce the air coolant (chip air) pressure.

Handpiece Purge The purge switch, located on the left side of the control head, flushes fresh water through the water coolant system. Guidelines from the Center for Disease Control (CDC) recommends that each handpiece be flushed (purged) 20 to 30 seconds between patients and several minutes at the beginning of each day. Handpieces must be removed from the holder to activate the purge system.

# **Troubleshooting**

### Symptom Handpiece lacks power.

### Possible Causes

- A. Improper supply pressure from compressor (80 psi).
- B. Check handpiece pressure adjustment on unit.
- C. Air filter may be plugged.
- D. Pinched supply tubing.
- E. Defective handpiece gasket at connection with tubing.
- F. Defective handpiece.

### **Symptom**

Water coolant does not shut off when foot control is released.

### Possible Causes

- A. Adjust air pressure to 80 psi—water pressure to 40 psi.
- B. Foot control is not exhausting.
- C. Defective water relay valve.
- D. Air coolant adjustment located on rear of unit

### **Symptom**

More than one handpiece is operating.

### Possible Causes

- A. Handpiece is not all the way in the holder.
- B. Improper adjustment on pilot valve in the handpiece holder.
- C. Defective shuttle valve to gauge.

### **Symptom**

Insufficient water coolant.

### Possible Causes

- A. Adjust coolant flow valve.
- B. Water filter may be plugged.
- C. Handpiece may be plugged.
- D. Pinched supply tubing.
- E. Improper adjustment of water relay valve.

### Symptom

Water coolant is running from handpiece while in the holder.

### **Possible Causes**

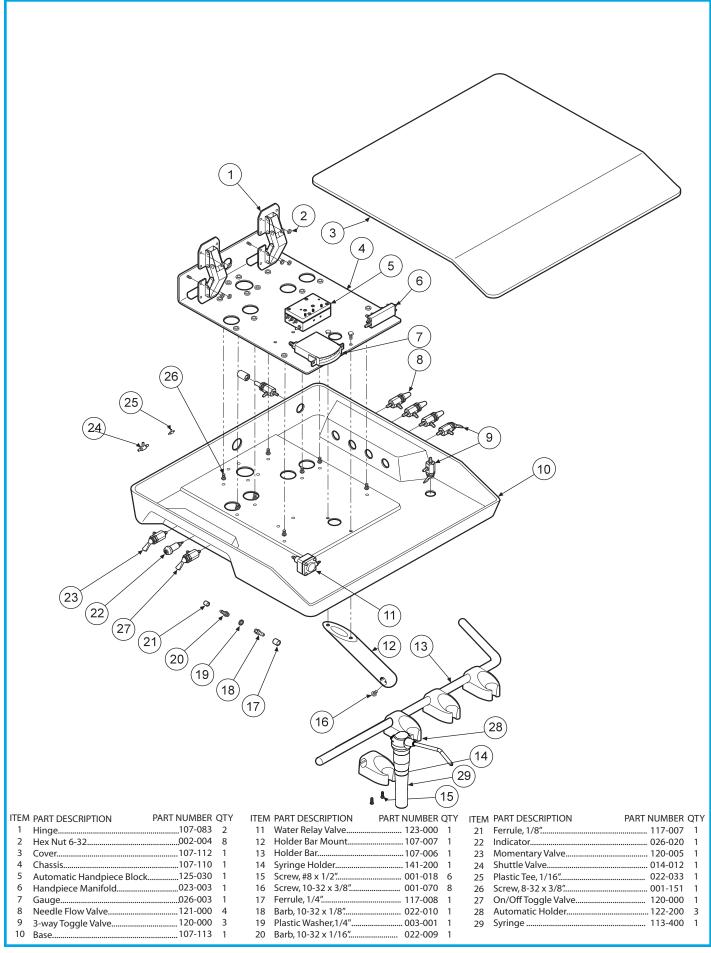

- A. Water pressure too high.
- B. Air pressure too low.
- C. Handpiece holder out of adjustment.

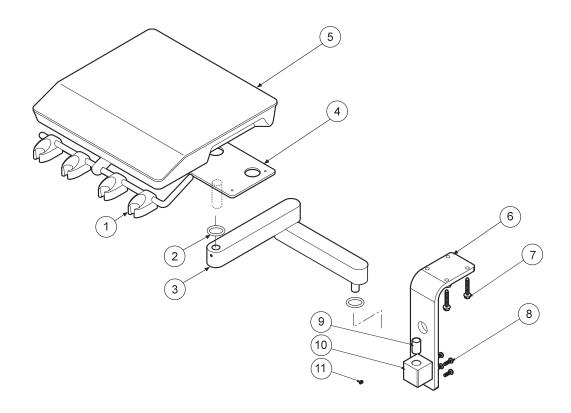

### Symptom

Water coolant is running continuously.

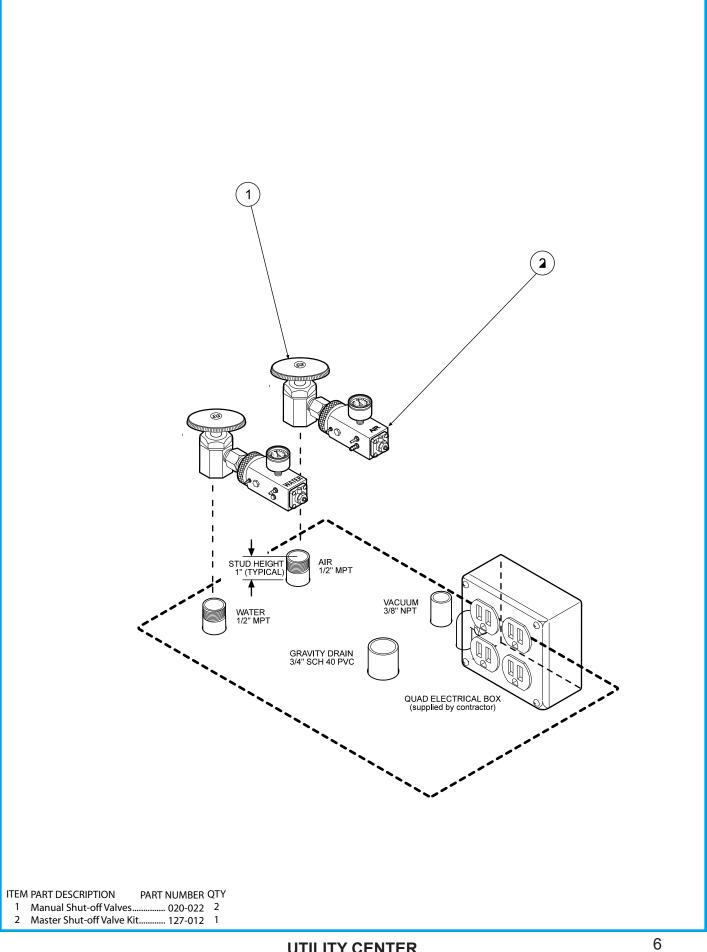

### Possible Causes

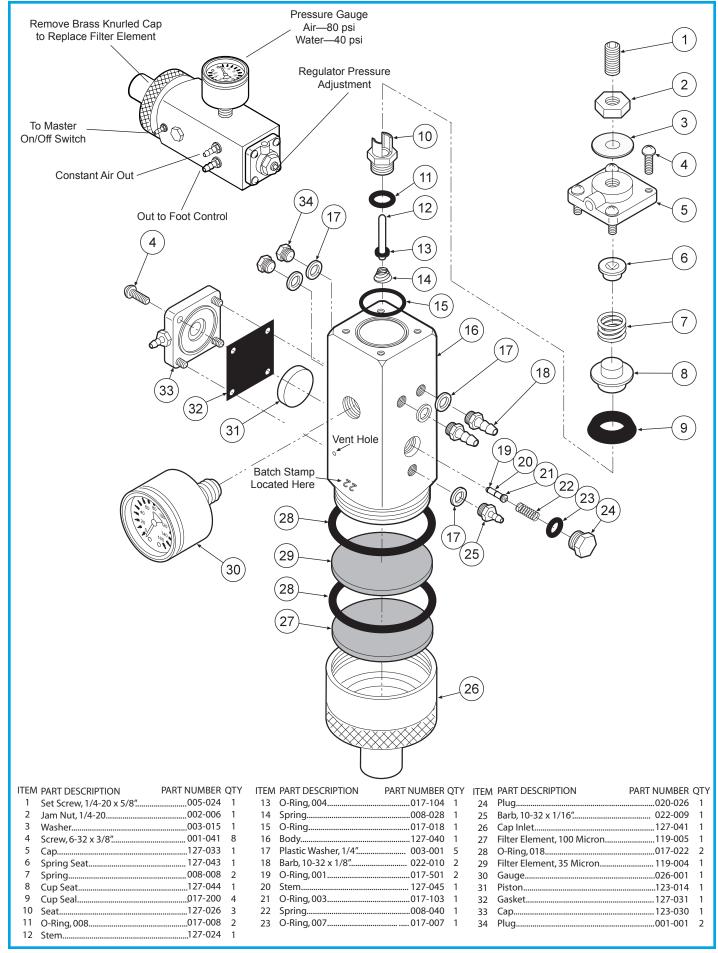

- A. Purge switch is on (on applicable systems).
- B. Water pressure to high.
- C. Handpiece holder out of adjustment.
- D. Defective water relay valve.

1. Remove the existing hex nut. A hex nut wrench has been provided.

- 2. Remove the syringe tip adapter using the hex wrench.
- 3. Insert the new syringe tip adapter into the syringe head and tighten using the hex wrench.
- 4. Place the two (2) O-Rings into the syringe tip nut.
- 5. Screw the syringe tip nut onto the syringe tip adapter and tighten using the hex wrench.
- 6. Push the syringe tip into the syringe tip nut until it snaps into place.

### Replace Syringe Tip

1. Pull the dirty syringe tip out and insert a clean syringe tip into the syringe tip nut until it snaps into place.

# IC Automatic Handpiece Control

# BDS warranties its product to be free of defects in material and workmanship for SEVEN FULL YEARS from the date of purchase on all units. Auto-blocks and standard foot controls are covered by a LIFETIME warranty when factory installed as part of a complete dental system. Upholstery has a TWO YEAR warrany and does not cover normal wear, stains, cuts or tears. Our LED lights have a FIVE year Warranty and our halogen light has a ONE year Warranty. Operatory chair motors feature a TEN year warranty. All warranty is limited to repair or replacement by BDS. Products returned to the factory and determined to be defective will be repaired or replaced free of charge at discretion of BDS. The warranty does not cover light bulbs, electrical components and trimmed or installed tubing. BDS reserves the right to void all warranties if any product is installed by other than an authorized technician. BDS' warranty does not cover damage to any surface finish, including but not limited to, discoloration or abrasion from cleaners, disinfectants or light sources. No claim for labor or consequential damages will be allowed. Return items must include a copy of the invoice or packing slip as proof of purchase.
