

Service Manual A-4150

3 HP Automatic Dr's Cart with Vacuum

Rev 5 - 1-10-20 900-035M

- **Installation** 1. Place the shipping carton in the desired location and open the carton.
 - 2. Tilt the carton so that the casters rest on the floor. Slide the cart out of the carton.
 - 3. A-4150 only. Mount the storage organizer frame to the working surface. Place the storage bins in the metal loops.
 - 4. Mount the utility center housing to the floor as per instructions in the Utility Center Template & Guide.
 - 5. Install master valve assemblies, with filter and regulator, onto the manual shut-off valves. (Pressures are preset at the factory: 80 psi air, 40 psi water).
 - 6. Feed the supply tubings from the umbilical through the 3/4" hole in the utility center housing. Screw in the spiral tubing to act as a strain relief.
 - 7. Connect the supply and vacuum tubings as shown in the Utility Center Template & Guide.

Check air pressure, adjust to 80 psi if necessary.

Final Check water pressure, adjust to 40 psi if necessary.

Adjustments Test handpieces for proper function.

Test syringe for proper pressure and function.

Test HVE and Saliva Ejector valve for proper function (A-4150 only).

- Operation 1. Turn on the master switch located on the left side of the control head.
 - 2. The handpiece is automatically activated when lifted from the holder.
 - 3. Depress the foot control to activate each handpiece. Pressure is shown on the gauge for the handpiece being used.
 - 4. Individual handpiece pressure adjustments are located on the autoblock inside the control head. To adjust the pressure to each handpiece:
 - a. Turn adjustment screw *clockwise* to decrease the handpiece pressure.
 - b. Turn adjustment screw counter-clockwise to increase the handpiece pressure.

CAUTION

When adjusting the handpiece pressure, do not overtighten the screws. Damage may result.

- 5. Activate the water spray to the handpiece by flipping the toggle for the water located in the center of the control head.
- 6. Water coolant flow adjustments are located to the right of the water coolant toggle switch.

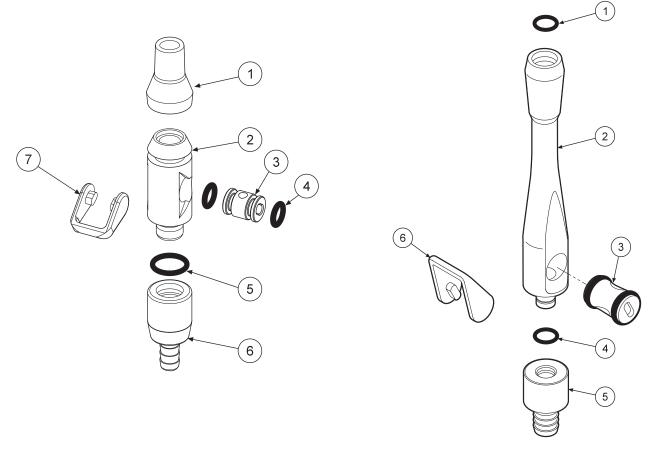

Handpiece Purge The purge switch, located on the right side of the control head, flushes fresh water through the water coolant system. Guidelines from the Center for Disease Control (CDC) recommends that each handpiece be flushed (purged) 20 to 30 seconds between patients and several minutes at the beginning of each day. Handpieces must be removed from the holder to activate the purge system.

Autoclavable HVE & S/E Valves

Maintenance Autoclavable vacuum valves may be autoclaved by steam autoclave or a chemical vapor. Due to the tight clearances and hardness of the anodized surfaces, the valve spool can become jammed or seize in the valve if it is sterilized while contaminated with debris.

Valves can be quickly disassembled for cleaning.

- 1. Pry one side of the lever and flip it off of the valve. For saliva ejector valves, remove the tip also.
- 2. Push out the valve spool and clean all the disassembled parts in an ultrasonic cleaner daily. Rinse thoroughly before putting into autoclave.
- 3. Lubricate the O-Rings on the spool with a silicone based lubricant before reassembly.

AUTOCLAVABLE S/E LEVER VALVE, CHROME 112-280

AUTOCLAVABLE STANDARD HVE VALVE

Control Panel A-4150/A-4100

Troubleshooting

Symptom

Handpiece lacks power.

Possible Causes

- A. Improper supply pressure from compressor (80 psi).
- B. Check handpiece pressure adjustment on unit.
- C. Air filter may be plugged.
- D. Pinched supply tubing.
- E. Defective handpiece gasket at connection with tubing.
- F. Defective handpiece.

Symptom

Water coolant does not shut off when foot control is released.

Possible Causes

- A. Adjust air pressure to 80 psi—water pressure to 40 psi.
- B. Foot control is not exhausting.
- C. Defective water relay valve.

Symptom

More than one handpiece is operating.

Possible Causes

- A. Handpiece is not all the way in the holder.
- B. Improper adjustment on pilot valve in the handpiece holder.
- C. Defective shuttle valve to gauge.

Symptom

Insufficient water coolant.

Possible Causes

- A. Adjust coolant flow valve.
- B. Water filter may be plugged.
- C. Handpiece may be plugged.
- D. Pinched supply tubing.
- E. Improper adjustment of water relay valve.

Symptom

Water coolant is running from handpiece while in the holder.

Possible Causes

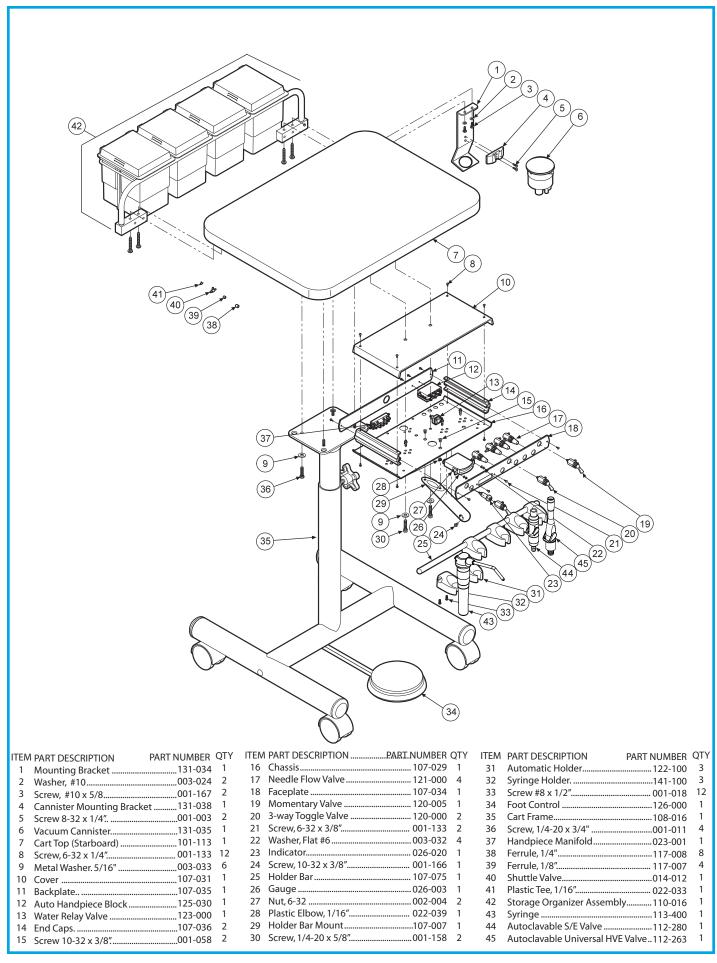

- A. Water pressure too high.
- B. Air pressure too low.
- C. Handpiece holder out of adjustment.

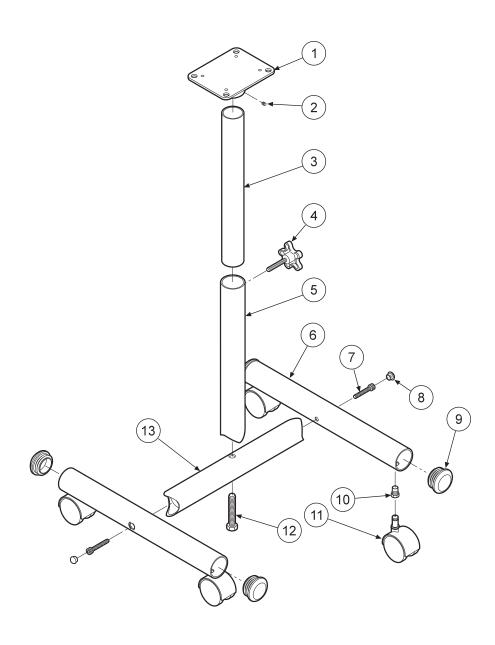

Symptom

Water coolant is running continuously.

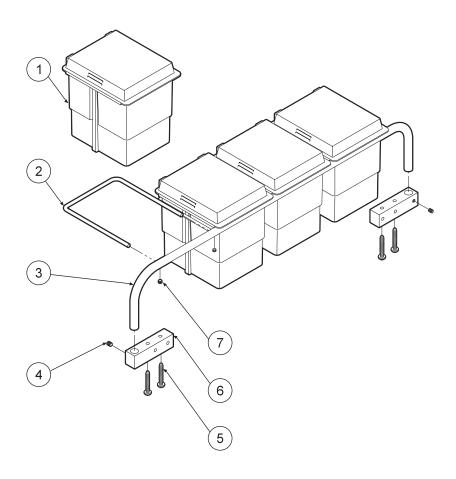

Possible Causes

- A. Purge switch is on (on applicable systems).
- B. Water pressure to high.
- C. Handpiece holder out of adjustment.
- D. Defective water relay valve.

3 Handpiece Automatic

BDS warranties its product to be free of defects in material and workmanship for SEVEN FULL YEARS from the date of purchase on all units. Auto-blocks and standard foot controls are covered by a LIFETIME warranty when factory installed as part of a complete dental system. Upholstery has a TWO YEAR warrany and does not cover normal wear, stains, cuts or tears. Our LED lights have a FIVE year Warranty and our halogen light has a ONE year Warranty. Operatory chair motors feature a TEN year warranty. All warranty is limited to repair or replacement by BDS. Products returned to the factory and determined to be defective will be repaired or replaced free of charge at discretion of BDS. The warranty does not cover light bulbs, electrical components and trimmed or installed tubing. BDS reserves the right to void all warranties if any product is installed by other than an authorized technician. BDS' warranty does not cover damage to any surface finish, including but not limited to, discoloration or abrasion from cleaners, disinfectants or light sources. No claim for labor or consequential damages will be allowed. Return items must include a copy of the invoice or packing slip as proof of purchase.
